

MANIKANTA MENDI

Data Analyst | Python | SQL | Machine Learning | Power BI

Hyderabad, India | +91 8332825988 | mani14kanta@gmail.com | linkedin.com/in/balaraghavendra-manikanta-mendib937b2161

PROFESSIONAL SUMMARY

Data Analyst with 4 years 11 months of experience delivering data analysis, machine learning models, and BI dashboards across healthcare, pharmaceutical export, and finance/e-commerce domains. Proficient in Python, SQL, and cloud-based data pipelines, with a track record of turning complex datasets into actionable business insights and translating technical results into stakeholder-friendly reporting.

SKILLS

Languages: Python (Advanced), SQL (Advanced), R (Intermediate), Bash, Java, .NET

Data & ML Tools: pandas, NumPy, scikit-learn, matplotlib, seaborn, XGBoost

Platforms: AWS (EC2, S3), Microsoft Azure, Google BigQuery, Azure Data Studio

BI & Dashboarding: Power BI, Tableau, Excel, Looker, Superset

Big Data: Spark, Databricks, Hadoop

Databases: MySQL, SQL Server

Version Control: Git, GitHub, GitLab CI, Bitbucket

Methodologies: Agile/Scrum, Waterfall, Verification & Validation

PROFESSIONAL EXPERIENCE

Data Analyst & Digital Operations Executive — Hare Krishnaa Healthcare LTD

Dec 2025 – Present

North Wembley, London, UK

- Built and maintained an international export client database by collecting, cleaning, and structuring data across multiple markets.
- Developed a centralized CRM for wholesalers, pharmacies, and distributors while ensuring compliance with export regulations.
- Analyzed market and sales data to identify high-value regions and support demand forecasting and pricing strategy.
- Created automated dashboards and reports to guide management decision-making.
- Supported Amazon and eBay OTC e-commerce operations, optimizing listings, pricing, and keywords to increase visibility and sales.

Data Analyst (Contract, Hourly) — AcmePharma

Mar 2025 – Nov 2025

Welwyn Garden City, UK

- Led data analysis for a non-invasive Continuous Glucose Monitoring (CGM) project using near-infrared spectroscopy.
- Processed and validated voltage signal data to ensure accuracy in detecting glucose and cholesterol levels.
- Developed and optimized machine learning models (Random Forest, Logistic Regression) to predict glucose and cholesterol levels with high accuracy.
- Designed scalable data pipelines integrating real-time sensor data into cloud-based storage.
- Built dashboards and visualizations to communicate insights to technical and non-technical stakeholders, including healthcare researchers.

Data Analyst — AmaraTech IT Solutions (US, Remote)

Jun 2024 – Jul 2025

Remote (from United Kingdom)

- Developed Python pipelines to clean, process, and model customer transaction data for performance scoring and segmentation.
- Conducted feature engineering, exploratory data analysis, and predictive modeling to support fraud detection and churn analysis.
- Deployed scikit-learn models and designed retraining strategies based on data drift flags and seasonal changes.
- Collaborated with developers and product managers to integrate analytics into production workflows via APIs and dashboards.
- Mentored junior analysts on scripting, KPI reporting, and model testing techniques.

Data Analyst Intern — OESON

Aug 2023 – Dec 2023

- Participated in real-world data analysis projects covering data collection, processing, and interpretation.
- Collected, cleaned, and analyzed data using Power BI and Excel, producing insightful reports and dashboards.
- Conducted statistical analysis and communicated findings clearly to stakeholders.

Data Associate — OpenText

Aug 2019 – Aug 2021

Hyderabad, India

- Oversaw digital experiences for multiple clients, resolving SQL database and search functionality issues.
- Developed Power BI dashboards to track frequency and nature of customer-reported problems.
- Conducted data cleaning processes to enable a deep understanding of client data.
- Delivered 1st and 2nd line technical support, maintaining SLA compliance and improving system uptime.

Machine Learning Intern — Efftronics Systems Pvt Ltd

Jan 2019 – Apr 2019

Vijayawada, India

- Built a number and image detection system using Python, NumPy, and Matplotlib.
- Contributed to an employee facial recognition access system trained using Azure ML.

PROJECTS

Diabetes Prediction Tool — Logistic Regression & Random Forest model with Tkinter GUI for real-time predictions.

IPL Data Analysis — Python and Tableau dashboards analyzing player performance and match trends.

Stock Market Trends Analysis — Time-series modeling and automated data pipelines for S&P 500 companies.

EDUCATION

MSc Data Science and Analytics

Sept 2021 – Sept 2023

University of Hertfordshire, Hatfield, UK

Master of Computer Applications (MCA)

2016 – 2019

VR Siddhartha Engineering College, Vijayawada, India

CERTIFICATIONS

- Microsoft Certified: Power BI Data Analyst Associate (In Progress)
- SQL for Data Analysts – Advanced T-SQL Techniques (TestYanthra)
- Excel to MySQL: Data Analytics Capstone Project (Coursera)
